# Getting Started

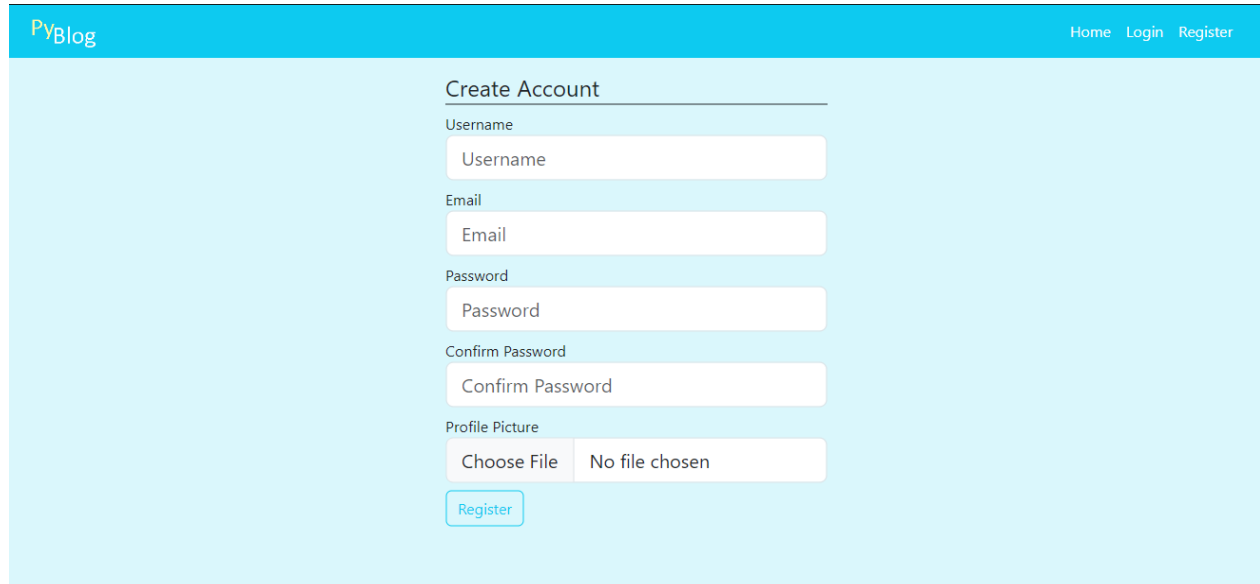

When first starting up PyBlog, the home page with posts will be displayed, as well as a navigation bar at the top of the screen. The navigation bar will be the main method of navigating the website.

To begin using PyBlog, click on the 'Register' link on the upper right of the website. This will allow features such as creating posts, making comments, and modifying your profile. If you already have an account, click 'Login' instead.

## Create New Account

To create an account, simply fill in a username, email address, password, password confirmation, and provide a profile picture for your account. Please note that the password needs to be at least 8 characters long. Your profile photo must also be a '.jpg', '.jpeg', or '.png' file. After everything is filled in correctly, simply click register.

The screenshot shows the 'Create Account' form on the PyBlog website. The form is centered on a light blue background. At the top, there is a blue header bar with the 'PyBlog' logo on the left and 'Home Login Register' links on the right. The form itself has a title 'Create Account' followed by a horizontal line. Below the title are five input fields: 'Username', 'Email', 'Password', 'Confirm Password', and 'Profile Picture'. The 'Profile Picture' field is a file upload control showing 'Choose File' and 'No file chosen'. At the bottom of the form is a blue 'Register' button.

After creating an account, the website will automatically redirect to the login page, and will ask you to login.

## Logging In

To log in simply fill out your login credentials into the relevant fields (username and password) and click submit. Please note that logging in with your email address will not successfully authorize you, unless your email is also your username.

Clicking 'Remember Me' will allow you to leave the website without logging out. We encourage you to only use this feature when using a personal computer and not a public one.

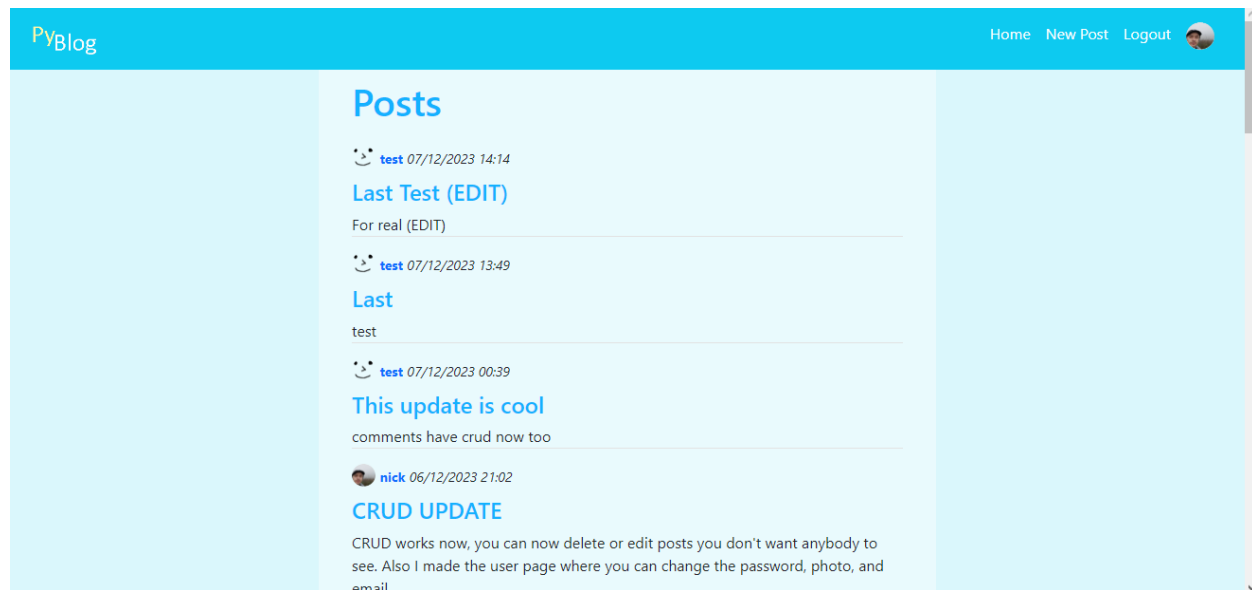

A screenshot of the PyBlog login page. The page has a light blue background. At the top, there is a dark blue header bar with the PyBlog logo on the left and links for Home, Login, and Register on the right. In the center of the page, there is a 'Log In' section. It includes a 'Username' label above a text input field, a 'Password' label above a text input field, a 'Remember Me' checkbox, and a 'Login' button. The 'Login' button is a small blue rectangle with white text.

## Home Page

The home page is the center of the website. It's where all posts reside and it's how you will access posts and comments. On the navbar at the top, you can return home by clicking 'Home', create a new post by clicking 'New Post', logout by clicking 'Logout', or update your profile by clicking on your profile picture.

To view a post and its comments, click on the title of a post.

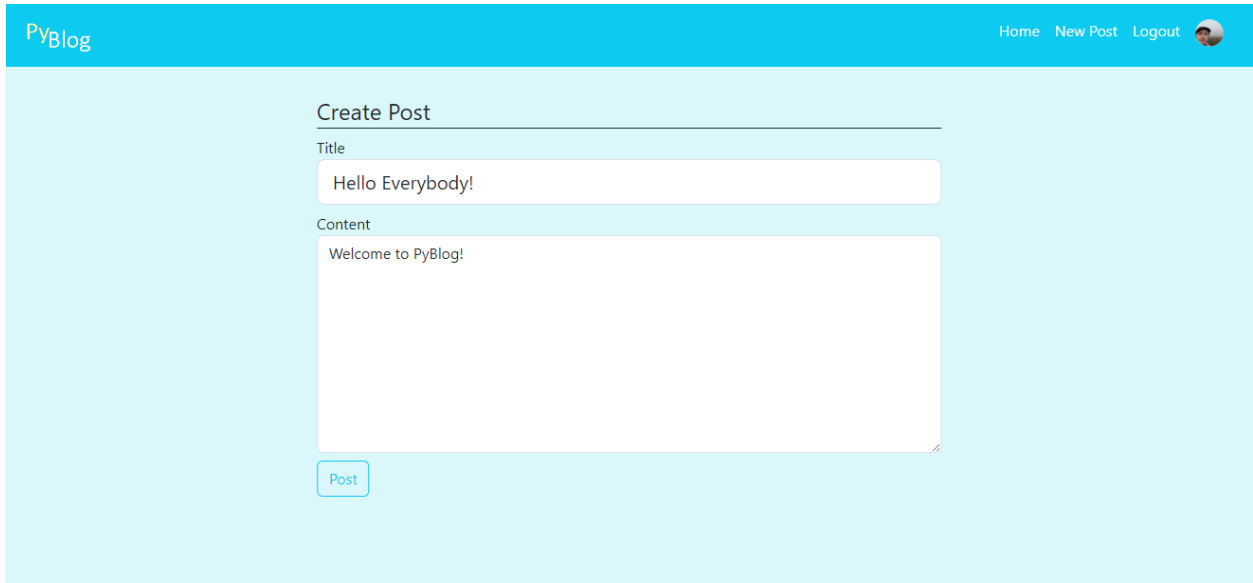

Posts are sorted from newest to oldest.

## Creating a Post

After clicking on 'New Post' in the navbar you will be redirected to the create post page.

To create a post, simply add a title in the 'title' form, and body in the 'content' form. After everything is written, just hit 'Post'. After submitting your post, you will be redirected to the page to view your post.

## Viewing a post

After clicking on the post title, or after creating a post, you will be redirected to view the post.

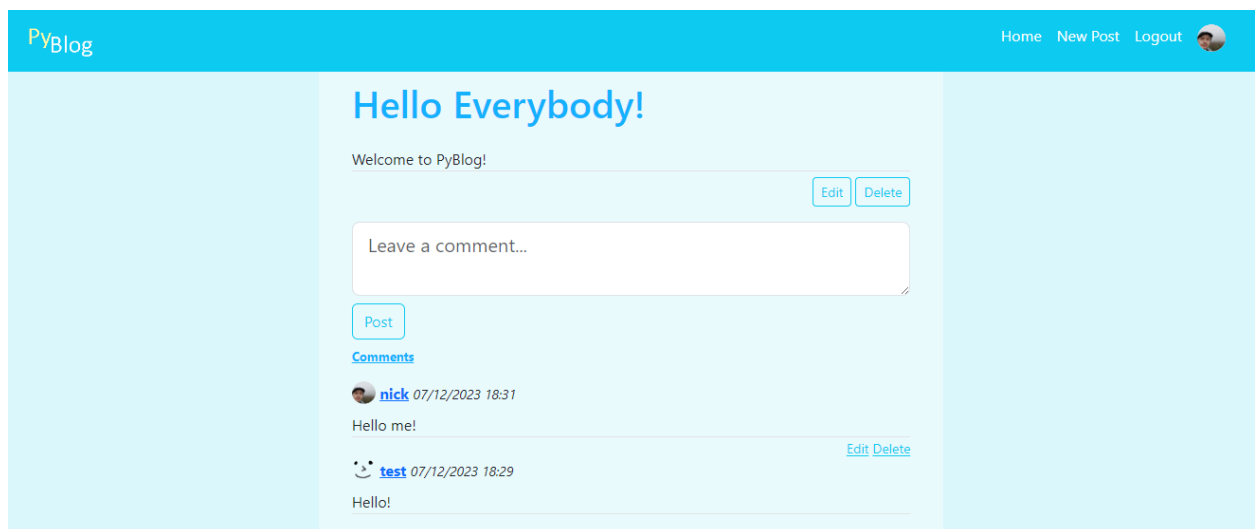

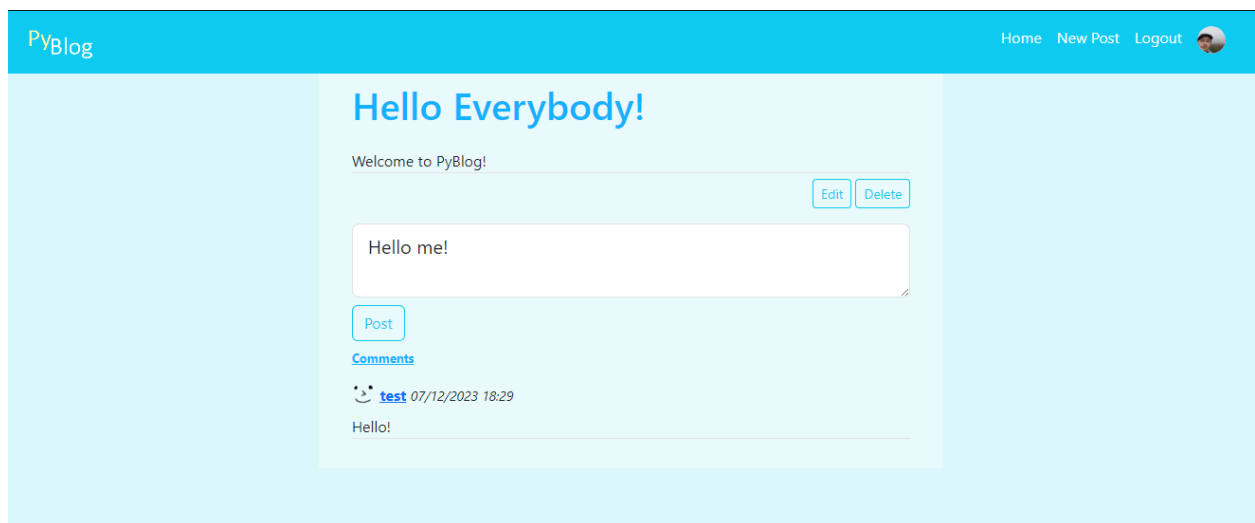

While viewing a post, you can leave a comment and view other's comments. When viewing your own post or comment, the edit and delete buttons will appear underneath it. This will let you edit or delete a post or comment respectively.

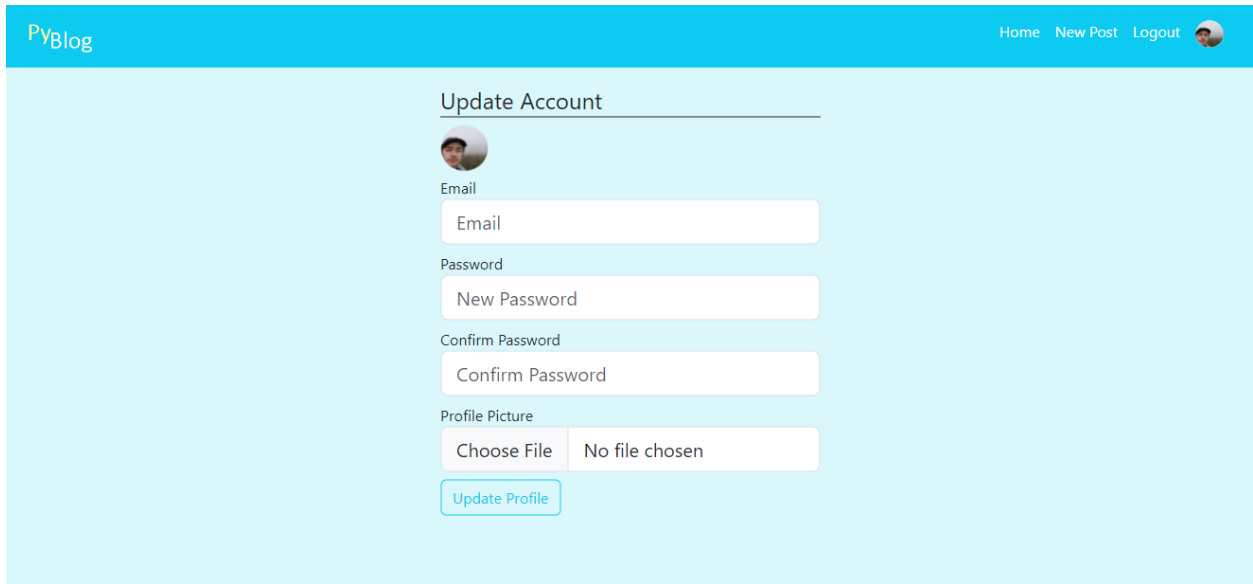

## Adding a comment

To add a comment to a post, you must be viewing a post. After that, simply fill in the field that states 'Leave a comment...'. When your comment is completed, simply click the 'Post' button and your comment will be sent

## Editing your profile

To edit your profile, simply click on your profile photo at the top right corner of the website.

The screenshot shows the 'Update Account' form on the PyBlog website. The form is centered on a light blue background. At the top, there is a header bar with the PyBlog logo on the left and navigation links 'Home', 'New Post', 'Logout', and a profile icon on the right. The form itself has a title 'Update Account' followed by a horizontal line. Below the title is a circular profile picture placeholder. The form contains four input fields: 'Email', 'Password' (with 'New Password' as a hint), 'Confirm Password', and 'Profile Picture'. The 'Profile Picture' field has a 'Choose File' button and a 'No file chosen' status. At the bottom of the form is an 'Update Profile' button.

Here, you can update your email, password, or profile photo. To update your password, you must also fill out the field to confirm your password. To finalize your changes, click the 'Update Profile' Button.

## Editing a post

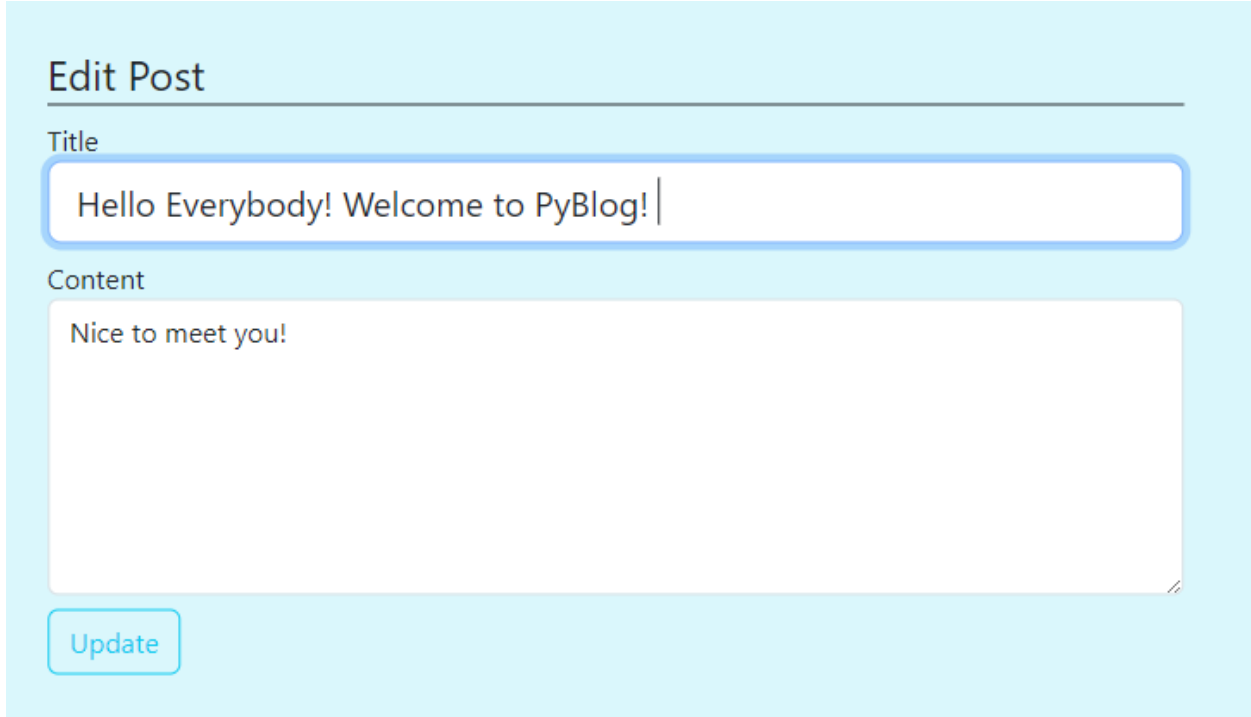

To edit a post, you must first be viewing your own post. After that, simply click the 'Edit' Button underneath your post.

Afterwards, you will be taken to a page where you can edit the post.

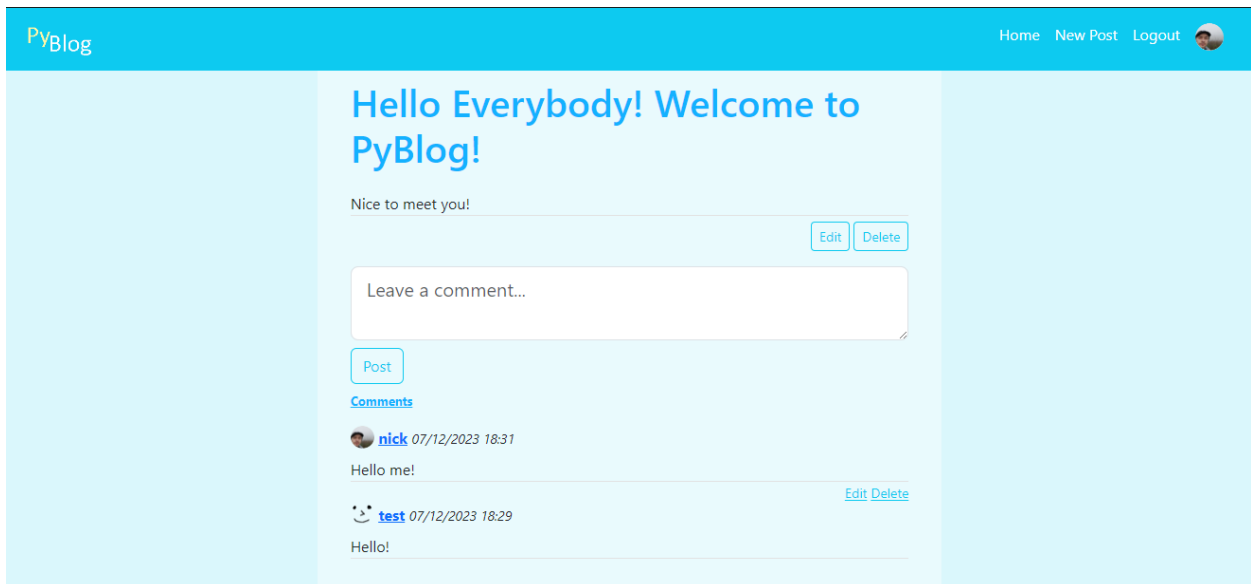

You can change both the title and the body of your post through this page.

The screenshot shows the 'Edit Post' interface. At the top, the title 'Edit Post' is displayed. Below it, there is a 'Title' label and a text input field containing 'Hello Everybody! Welcome to PyBlog!'. Underneath the title field is a 'Content' label and a larger text area containing 'Nice to meet you!'. At the bottom left of the form is a blue 'Update' button.

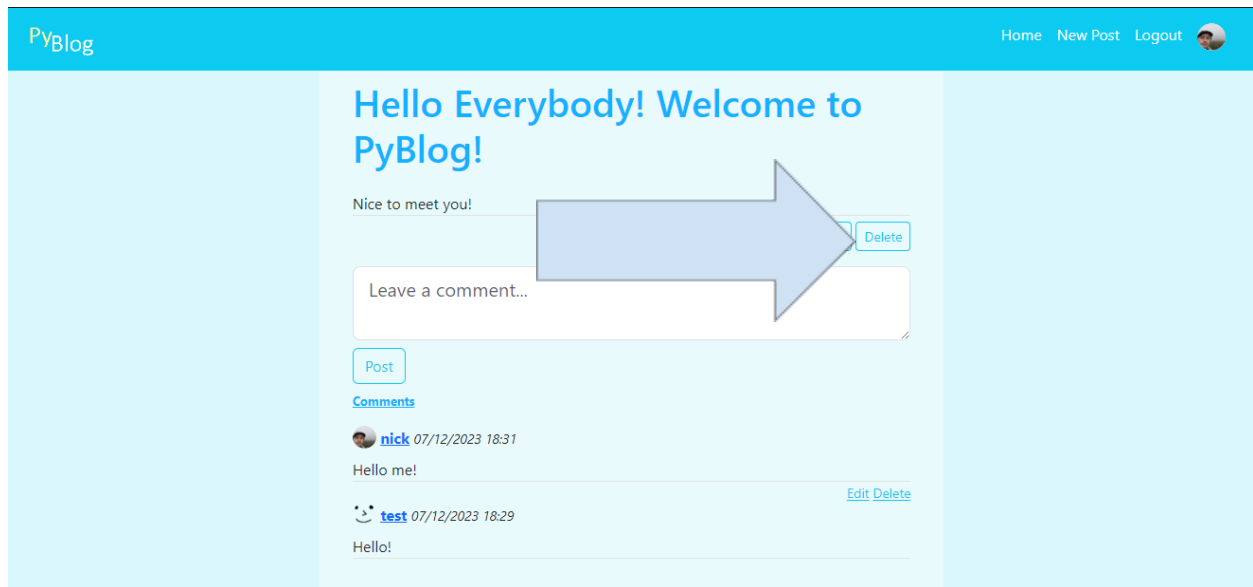

To finalize your edit, click the 'Update' button.

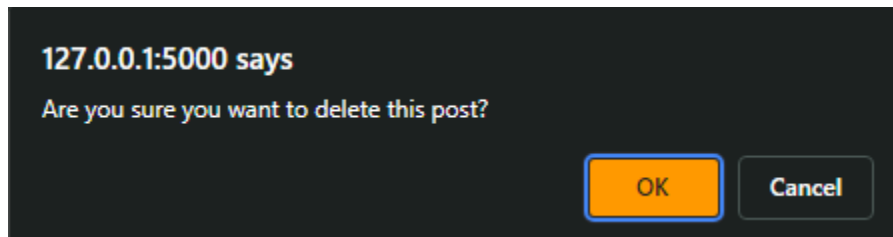

The screenshot shows the PyBlog homepage. The header includes the 'PyBlog' logo and navigation links for 'Home', 'New Post', and 'Logout'. The main content area displays a post with the title 'Hello Everybody! Welcome to PyBlog!' and the body 'Nice to meet you!'. Below the post body are 'Edit' and 'Delete' buttons. A comment section follows, with a text input field labeled 'Leave a comment...' and a 'Post' button. The comments list shows two entries: one by 'nick' on 07/12/2023 at 18:31 with the text 'Hello me!', and another by 'test' on 07/12/2023 at 18:29 with the text 'Hello!'. Each comment has 'Edit' and 'Delete' links.

## Deleting a post

You must be viewing your own post to delete a post. Afterwards, click the 'Delete' Button underneath your post.

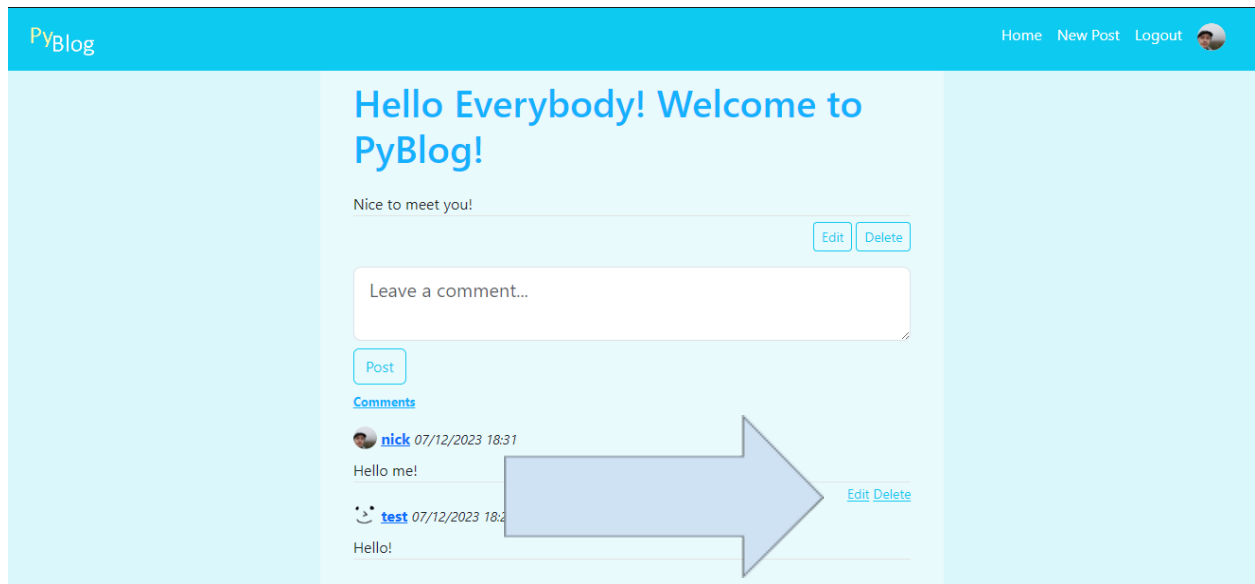

A popup will appear asking if you would like to delete the post. To continue, click OK

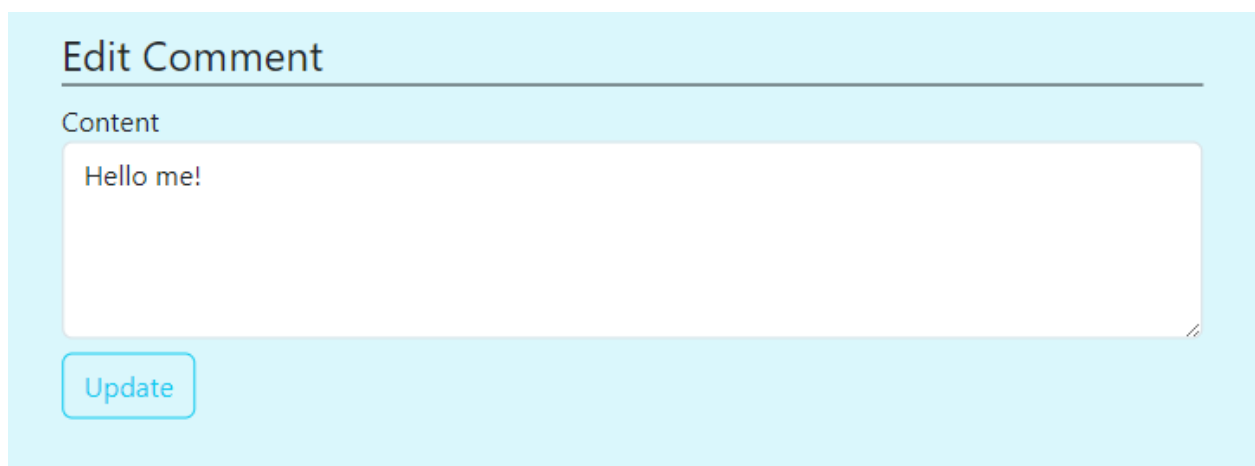

After confirming, your post will be removed from the database, and you or other users will not be able to see it.

## Editing a comment

To edit a comment, you must be viewing the post where your comment is. Underneath your comment, you will see a link that says 'Edit'. Clicking this will allow you to edit your comment.

After clicking, you will be redirected to the edit comment page.

After changing the text, click the 'Update' button, and your comment will be changed.

Hello!

## Deleting a comment

To delete a comment, simply click the 'Delete' link underneath your comment.

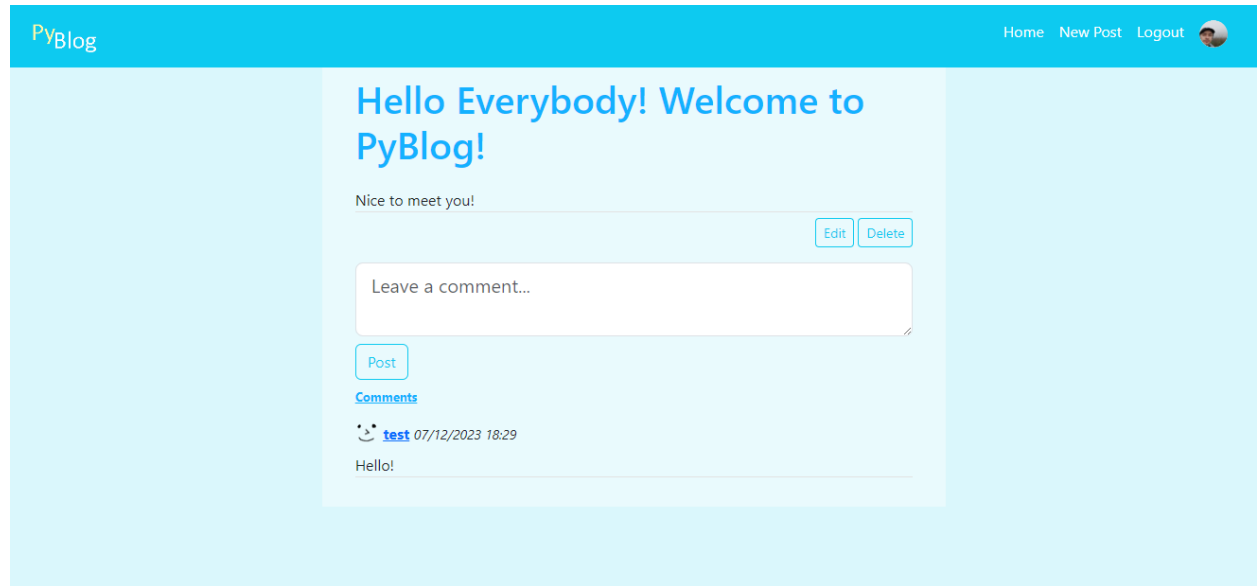

A popup will show up confirming if you want to delete the comment. To delete, click OK.

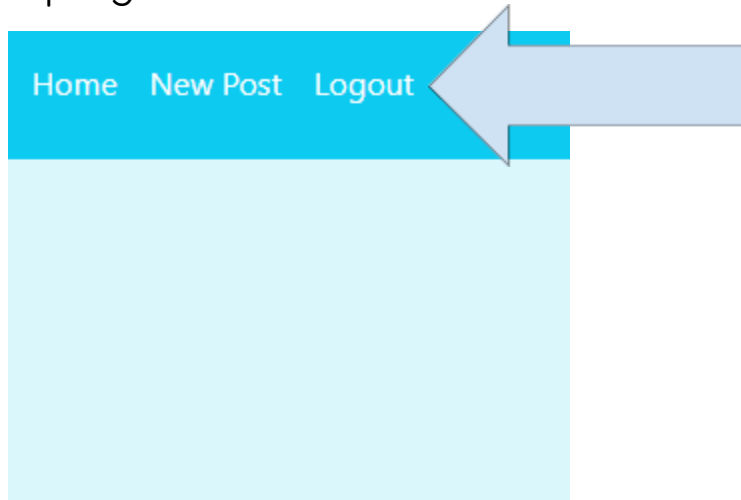

After deleting the comment, it will be removed from the database and no longer be visible to yourself or other users.

# Logging Out

To logout, click the 'Logout' button in the navbar located at the top right of the website

Doing so will log you out. Next time you wish to use your account again, you will have to log back in.
